

OptOut

These records are used to record where a patient has asked to Opt Out of their data being used for a particular purpose. This will usually (but potentially not always) be where inclusion would otherwise be assumed due to s251 permissions etc.

If a patient decides to end their Opt Out a ToTime should be added to the record. If then then subsequently withdraw it again a new record with a different ExternalId should be created.

```
<OptOuts>
  <OptOut>
    <EnteredAt>
      <CodingStandard>UKRR</CodingStandard>
      <Code>RR1+</Code>
      <Description>Demonstration Entries</Description>
    </EnteredAt>
    <ProgramName>UKRR</ProgramName>
    <ProgramDescription>UK Renal Registry</ProgramDescription>
    <FromTime>2018-06-25</FromTime>
    <UpdatedOn>2018-06-25T07:24:31</UpdatedOn>
    <ExternalId>50889490</ExternalId>
  </OptOut>
</OptOuts>
