

Medication

All medications should be submitted whether or not prescribed for the purposes of renal care.

Types

- [Medication](#)

Complex Types

Medication							
PrescriptionNumber	Prescription Id xs:string (restricted) maxLength: 100						
FromTime	Start Time of the prescription xs:dateTime						
ToTime	End Time of the prescription xs:dateTime						
OrderedBy	Prescriber - National Id Clinician						
EnteringOrganization	Where the Medicine was Prescribed Location						
Route	Medication Route						
	<table border="1"><tr><td>CodingStandard</td><td>xs:string (restricted) Enumeration:<ul style="list-style-type: none">• SNOMED ()• RR22 ()</td></tr><tr><td>Code</td><td>xs:string (restricted) maxLength: 18</td></tr><tr><td>Description</td><td>xs:string (restricted) maxLength: 100</td></tr></table>	CodingStandard	xs:string (restricted) Enumeration: <ul style="list-style-type: none">• SNOMED ()• RR22 ()	Code	xs:string (restricted) maxLength: 18	Description	xs:string (restricted) maxLength: 100
	CodingStandard	xs:string (restricted) Enumeration: <ul style="list-style-type: none">• SNOMED ()• RR22 ()					
Code	xs:string (restricted) maxLength: 18						
Description	xs:string (restricted) maxLength: 100						
DrugProduct	DrugProduct						
Frequency	Frequency xs:string (restricted) maxLength: 255						
Comments	Other instructions xs:string (restricted) maxLength: 255						
DoseQuantity	Dose xs:decimal						
DoseUoM	CodedField						
Indication	The condition or problem for which the drug is being prescribed xs:string (restricted) maxLength: 100						
EncounterNumber	This is used to associate the prescribing of a Medication with the activity in a particular Encounter record. This element should not be submitted without prior discussion with the UKRR. xs:string						

Schema

[Schema Medication \(Github\)](#)

Example

```

<Medication>
  <FromTime>2000-01-01T09:30:10Z</FromTime>
  <ToTime>2000-01-01T09:30:10Z</ToTime>
  <DoseUoM>
    <CodingStandard>
  </DoseUoM>
</Medication>

```

Types

- [CF_DMD](#)

Complex Types

CF_DMD	
CodingStandard	xs:string (restricted) Enumeration: <ul style="list-style-type: none"> • DM+D ()
Code	xs:string (restricted) maxLength: 32000
Description	xs:string (restricted) maxLength: 32000

Types

- [CF_RR23](#)

Complex Types

CF_RR23	
CodingStandard	xs:string (restricted) Enumeration: <ul style="list-style-type: none"> • CF_RR23 ()
Code	xs:string (restricted) Enumeration: <ul style="list-style-type: none"> • l (Litres) • dl (Decilitres) • ml (Millilitres) • g (Grams) • mg (Miligrams) • g (Micrograms) • ng (Nanograms) • tab (Tablets) • units (Units (i.e. for Epoetins)) • mmol (Minimols) • other (Other)
Description	xs:string (restricted) maxLength: 32000
